NOTES SPORTIVES

L'année 1903 aura procuré aux amis de l'activité musculaire cette impression de sécurité satisfaite que donne le progrès sans secousses et sans accroc, le progrès régulier et normal. Les sports ont grandi, non point par bonds et par saccades, mais de la façon qu'annonçaient leur vitalité et l'accroissement probable de leur sphère d'action.

L'aérostation s'est classée parmi eux. Ce résultat est amusant parce qu'imprévu. L'aérostation ne fut d'abord qu'une audace scientifique. On montait en ballon « si haut qu'on peut monter » comme feu Madame Malbrouck à sa tour, — dans le but de faire des expériences et de sonder les mystères atmosphériques ; ce fut noble et dangereux ; quelques-uns des plus hardis périrent ; L'aérostation visa par la suite à devenir un moyen de locomotion ;
