

News from Japan

We have received a letter from our member for Japan, M. Matsuzo Nagai. He tells us that the sporting life in his country is being revived. The National Olympic Committee has restarted its work after the war and a new Association to the Olympic movement in Japan has also been started. It is called „ Japan Olympic Association ” and its object is to encourage Olympic activities by rendering assistance for uplifting on the national sporting life as well as for cementing international friendship. The National Olympic Association of Japan continues to take care of the Olympic interests.
