

Exhibition of Sports Photography

The halls of the vast Sports Palace at the E.U.R. will be the scene of the Olympic Exhibition of Sports Photography following an invitation to the Olympic Committees of the various Nations, and accepted by thirty-three of these, who have entered a quantity of valuable material. It gives the best possible illustration of the sports practiced in the respective Countries.

The Exhibition is the result of a careful selection made by the individual Committees in accordance with the requirements of a particular Regulation and after selection a maxi-

mum of ten black-and-white and a number of coloured photographs have been chosen to represent each country. In the case of Italy, there have been so many entries to this special competition organized by the Organizing Committee that the number of photographs permitted was obviously greater.

A catalogue of all the photographs exhibited has been published with explanations in Italian, French and English, so that, with the aid of this catalogue, visitors may follow intelligently this interesting Exhibition.
