

## No Need to Figure Baseball Averages Any More

A new book has been published for the baseball and bowling public. With the aid of this book any one can determine the percentages of individual players as well as of teams, and as the foundation of baseball's greatness rests upon the ability to compare the merits of individual players by their averages, the book no doubt will prove a very convenient and valuable asset to all persons interested in this popular sport.

For the bowler it contains averages from 125 to 200 and games from 3 to 110. It also contains The American Bowling Congress rules. It is a neat book of 300 pages, bound in cloth, and is called "The Baseball and Bowling Standard Calculator."

It has the earnest endorsement of such men as Chas. Comiskey, President of the Chicago White Sox; Coach Alonzo Stagg, of the University of Chicago; Ed. Smith, Sporting Editor of the Chicago Evening American; and many other well-known officials.

It is published by The Baseball and Bowling Standard Calculator, Chicago. The price of the book is 50 cents, post-paid.
