## Time and Site Committee Report

The growing stability and maturity of the NASSH organization is reflected in many ways. One of them is the Time and Site Chairman's increased efficiency in obtaining future sites for the annual conventions. Six consecutive successful annual meetings, of course, is the single most important reason that a growing number of university faculty are interested in hosting future NASSH meetings.

Dr. Jean Leiper (Calgary University) is anticipating an outstanding NASSH meeting (academically and geographically) at world-famous Banff, Alberta, Canada Recreation Center, from May 24-27, 1980. Professor Mary E. Keyes of McMaster University in Hamilton, Ontario, is looking forward to a 1981 convention on her campus, while Donald J. Mrozek, Ph.D., of Kansas State University's History Department, is carefully planning for a 1982 NASSH meeting in Manhattan, Kansas. All three — Leiper, Keyes, and Mrozek — will be asked to make progress reports at this year's business meeting. A warmly affectionate thanks to Dr. Mary Lou LeCompte for her enthusiasm, very hard work, and successful fruition of this 1979 meeting on her Austin, Texas campus,

Respectfully submitted,  
John Lucas  
Time & Site Chairman
